-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-3, 5-12 and 14-16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicants have amended the claims to recite "about 14-20%" and specificational basis for this phrase could not be found.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3, 5-12 and 14-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite because the scope of the phrase "about 14-20%" is unknown.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1761

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 5-12 and 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsuura et al. (Jap. Pat. No. 10262641) ("Matsuura") in view of Nagao et al. (Jap. Pat. No. 7059553) ("Nagao") for the reasons set forth in the last Office action.

Response to Arguments

Applicants' arguments filed 08/10/04 have been fully considered but they are not persuasive.

Applicants have amended the claims to require the use of a preservative other than the alcohol of the sake or the acids found in the added fruits. They argue that because sake is known to the public as being a preservative free beverage, those of ordinary skill would not find it obvious to add notoriously well known preservatives. Applicants further state that the claims require the alcohol content to be quite high.

This is not totally accurate, as the lower limit is "about 14%." At this time it is not clear far below 14% the claims extend, but even at 14%, this represents an alcohol level that is not uncommon in wines. As is well known, wines commonly use preservatives such as those found in the dependent claims.

Applicants are combining several well known preserving processes and it has yet to be shown that anything unexpected is obtained. Lastly, it is noted that the pasteurization process of the instant process is used in the prior art to inactivate enzymes that would not be inactivated by any other means. Therefore, there is added motivation

Art Unit: 1761

to use both pasteurization, in order to deactivate fruit enzymes, and a preservative, other than alcohol or the fruit acids (which may or may not be in an amount to ensure long term preservation).
